

***Introducing a FREE half-day workshop for investors
who want to profit in all market conditions.***

***Come to our [xxxOrange Countyxxx] center to learn
how professional traders are making money right now, and how you can too.***

***But attendance is strictly limited to the first 25 who apply.
So call now (888) 682-6823 and mention your reservation code 11890.***

Dear Carol:

We scrimped and saved. We invested prudently. We listened to the pundits and the “conventional wisdom”. And we watched the value of our hard-won capital decrease by 40% more.

It’s time to get even.

You can start now by attending a FREE workshop, **designed specifically for investors who are ready to quit the habits that have lost them money**. Instead of “buy and hold”, “mutual funds are the best investment”, “your broker is always right”, you’ll learn to actively manage your capital as a *Market-Driven Trader*.

And you’ll learn this from seasoned traders who were making money during the drop to 6500, and are **making money today on up days, down days or days when the market goes sideways**. Ask them how with your toughest questions or, better yet, ask them to prove it with *live trades right before your eyes*.

As you can see, our *How to Become a Market-Driven Trader™* workshop is an event unlike anything you’ve experienced. But attendance is strictly limited to the first 25 who apply, so please call (888) 682-6823 with your reservation code today.

What makes this workshop so different? To begin with, it’s about hands-on, practical trading—no abstract theory here. And we don’t mince words when it comes to what you need to get better results. You’ll learn what we call the “7 Pillars of Effective Trading”—and why you need to master every one of them to read the market like a pro.

And one more thing. This isn’t another of those “hotel ballroom seminars” you may have sat through. You’ll join a small group in our permanent education center in [xxxxxxxOrange Countyxxxxxxx]... in a comfortable classroom,

Please read on ...

surrounded by the state-of-the-art workstations used by our continuing students.

And that's just the beginning of what makes Online Trading Academy unique ...

We evolved from one of the largest trading floors in the U.S. to a global institution with 30 education centers worldwide. Over 12,000 successful graduates will tell you **the only way to learn trading is to do it**—with your own workstation, under the watchful guidance of a skilled instructor who is also a professional trader.

And that's not all: **we allow students to make these live trades with our money.** That's right. We cover the commission tickets, we absorb any losses—*so our students can live the dream of putting aside their emotions and building skills and confidence without letting fear of failure get in the way.*

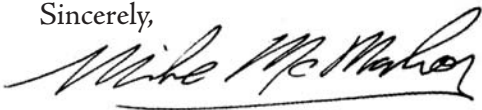

Clearly, we couldn't have such a generous policy if we weren't pretty confident our students were going to make the right decisions in the marketplace.

The proof is in the results—and it shows the value of a training approach based on education and self-discipline as the key to investing success, whether you are speculating for quick gains or building a nest egg for a comfortable retirement.

You'll find out more about our advanced classes during your workshop. Most likely, you'll even meet some of our continuing students as well. Online Trading Academy offers a collegial atmosphere where **students can return to repeat their training whenever they want a refresher course—at absolutely no cost, for life.**

It all starts when you come to our workshop, *How to Become a Market-Driven Trader*. A \$199 value, it's FREE to you through this personal invitation. Plus, you'll take home our *7 Pillars of Trading* double-CD set—a \$99 value—your bonus gift for attending. **Call toll free (888) 682-6823** with your reservation code today!

Sincerely,

Mike McMahon

Director of Education, Online Trading Academy

P.S. I promised we were going to “get even” with all the sources of misinformation and the unruly market. Actually, we're going to do quite a bit better than that!

At the workshop you'll learn about risk management strategies to safely rebuild your retirement savings—along with specific actions you can take to maximize trends in the market. **Call (888) 682-6823 to reserve your place today!**
